We understand **full quality control** because we have vertically integrated lines allowing us to not only make the final product but also the raw materials that go into the final product.

Focus on Color for Agricultural Use

AAKASH CHEMICALS

THE SKY
IS THE LIMIT

- Formula was specifically designed for agricultural use
- Formula helps prevent flocculation
- Fully compatible with polymeric systems currently used in today's agricultural coatings/treatments
- Smooth surface should also help improve flowability

Selected Product Benefits

AAKASH CHEMICALS

THE SKY
IS THE LIMIT

- Imparts deep rich colors and gloss giving the seed more visual appeal
- Higher pigment solids allows for more active ingredients
- Low viscosity allows for easy handling and equal coverage of the seed
- USDA recognized bio based product replaces petroleum based propylene glycol
- Nano milling technology further decreases potential of flocculation
- Vertically integrated manufacturer with expertise in pigment chemistries
